DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kalley (306)/(000) in view of DE 19938480 A, Ciana (612), and Pinkus (213); as applied in the first office action.

In response to applicant's amendment of 9-18-02, it should first be noticed that the older primary references to Kalley (306)/(000) disclose the use of a non-diode emitting lamp for inspection of air conditioning/refrigeration. However, newer prior art to the secondary references strongly suggests that newer, alternative solid state diodes would be beneficial in exciting fluorescent dyes, with the wavelength(s) selected according to what is to be inspected. As previously stated a broad teaching can be seen in the secondary reference to Ciana (col.2, third paragraph). For example, **"In recent years, the evolution of solid state emitting diodes and solid state detectors has progressed rapidly as has the chemistry of fluorescent dyes. ... the development of inexpensive commercial diode"**.

Applicant secondly argues an inherent capacity of solid state diodes, which is lower power consumption. However, it should be pointed out the low power consumption is not even mentioned in the claims. Lastly, applicant argues (page 5 of

the amendment) about a well known biconvex lens that can be utilized, but once again no claims are even presented for such a lens.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
